**Reasons for Allowance**

This action is in response to the after final amendment filed 10/01/2009. The claims have been entered and are subsequently allowed. Claims 1 and 3-11 have been canceled. Claims 2 has been amended and is allowed.

The following is an examiner's statement of reasons for allowance:

Claim 2 is patentable over the prior art because of the sealing element wherein the sealing element is an elastic member defining a sealing lip and having an interior diameter, the sealing element being pushed over the proximal end of the coaxial cannula, the interior diameter being dimensioned to leave open a gap between the sealing lip of the sealing element and the biopsy needle unit, and the elasticity of the sealing element is such that, given an underpressure in the intermediate space between the exterior wall of the biopsy needle unit and the interior wall of the coaxial cannula, the sealing lip of the sealing element at the gap comes into contact with the biopsy needle unit to form a seal against the biopsy needle unit.

These limitations viewed in light of claim 2 as a whole are not taught or suggested by the prior art either alone or in combination. The limitations serve to permit the device to perform its intended function which is to permit air to escape during device insertion and prevent air flow after insertion has occurred, to reduce errors in imaging of the insertion area resulting from trapped pockets of air.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
